

Good Evening,

I'm hoping you might have some time tomorrow to review the plans for pouring concrete in front of Jacky's business, Personal Finance located at 308 N. Washington Avenue.

I've spoken with Carl about my concerns regarding grading dirt up against the front floor joists. This practice likely contributed to the termite damage Jacky experienced after the initial sidewalk installation. In addition to that, I'm worried about potential moisture issues that could arise from the new concrete pour.

Please let me know if you're available tomorrow to discuss these concerns and review the plans together.

Thank You!

Larry Watts
