

Larry,

As indicated in Casey's response below his crew will remove the boards and expansion material that cross over the footing. As far as the ground wire you will need to determine who removed it and have it reattached. Let me know if there is anything else you need or have questions on.

Eric G. Powell, PE

Eric - I'll have them cut the boards as discussed.

The ground wire was NOT removed yesterday by anyone under CSC supervision. It was done during the pour time yesterday. CSC will not be reinstalling such.

I will speak with Casey\Karl today and have one of his crew to trim any boards that extend over the footing\property line. As far as the grounding wire is concerned I would need to know who removed the grounding wire from the grounding rod initially . I will defer to Casey to determine if anyone from his crew removed it.

Subject: Water proofing and electrical service grounding.

Good Morning Mr. Powell,

I'm seeking some guidance on a couple of matters:

1. The board extending over the footer needs to be cut at the footer this morning so that I can waterproof this area before the rain. Could you please advise if I should proceed with the cutting? If not, could you arrange for someone to handle it this morning? (See attachment: IMG_4932 (1).jpeg)

<image002.jpg>

2. Who should reattach our building's electrical service ground wire to the ground rod?

<image004.jpg>

<image006.jpg>

Respectfully,

Larry Watts
